

QR Download

DataKart allows brand owners to download QR barcode which is encoded with a web URL that provides detailed information of the product. On scanning the QR code using any QR Code scanner will redirect it to web URL that shows the product details. Brand owners can download the QR code also incorporate it as a part of their product label.

Prerequisite

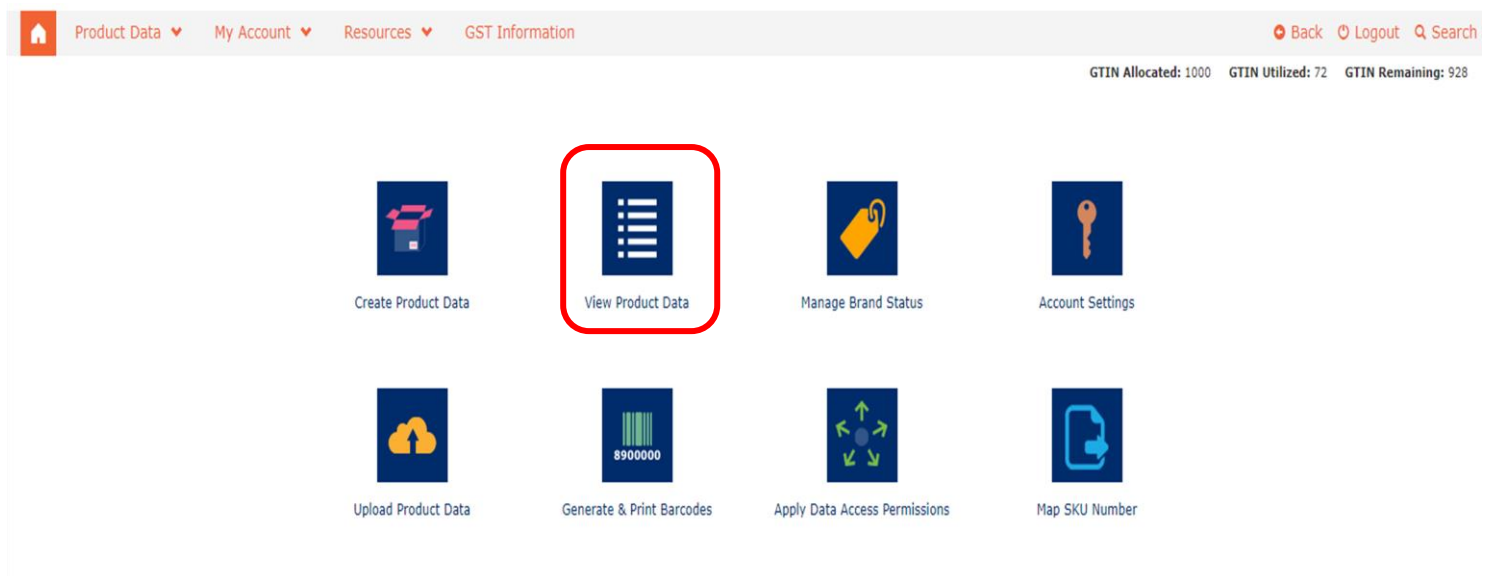

Create product data on DataKart and publish it to Smart Consumer mobile application prior to download QR code.

Disclaimer

QR code is not used for point of sale purpose. For point of sale purpose use EAN 13

Steps to download QR code barcode

- Go to module "View Product Data"

- Look for QR code icon under column Barcode. Click on the QR code icon to download the image.
